Cancer Prevention for Your Child
HPV Vaccine

EVERY YEAR
AMERICAN INDIAN MEN AND WOMEN
GET HPV CANCERS THAT COULD BE PREVENTED BY THE VACCINE

Oropharyngeal (back of throat)
Penile
Anal

Cervical
Oropharyngeal (back of throat)
Vaginal
Anal
Vulvar

WHY GET THE VACCINE?

IT’S SAFE
More than 57 million doses of the vaccine have been given, with zero serious safety concerns

IT’S IMPORTANT
American Indians are more likely to get and die from cancer than the general population

IT’S FREE
Vaccines are available at no cost for all American Indian children at any clinic

IT WORKS
The vaccine prevents 90% of the cancer-causing HPV viruses

THE TIME IS NOW.

Age 11-12 is the most effective time to get the HPV vaccine to protect your child from cancer later in life

TAKE ACTION
Talk to your doctor about the HPV vaccine. Be confident in your choice to vaccinate your child.

Talk to your friends, your family, and your community about how to protect your children from cancer with the HPV vaccine.
